

Dear Renee Westmoreland Director of Design,

I am thrilled to submit my application for UI/UX Designer with Candid.! I love the mission of the company and the mindful application of technology. I would be honored to grow the community for Candid., like I previously have for globally recognized brands and organizations. As a Web/UI/UX Designer, I've developed, executed, and analyzed for global organizations. As a team of one designer, I oversee and create all content (branding, marketing, design), and use several social media platforms to build up community online. Connecting with people and finding out what pleases them is one of my favorite things about web design!

As the lead designer in Juniper Designs, I'm responsible for shaping the company's mission and nature of operation- both online, and in person. During my time as the head of this company, I've led with our social impact mission in mind at all times, sustainability and accessibility. Having a societal impact is one of my core values, and I believe I was put on this earth to transform the way people interact with the online world. After starting my first business at age 20 running my own bakery, I've had a passion for being a business pioneer.

Having such a passion for the worldwide community both online and offline, much like Candid., I want to make an impact and a difference in the way people experience their favorite sites, apps, and platforms.

Please let me know if you have any questions regarding my work or myself, I can't wait to hear from you!

-Juniper Stanley
UX/UI Designer
